A NOTE FOR PARENTS

WHY COLORING IS GOOD FOR KIDS

Coloring looks like simple fun, and it is. But while your little one picks colors for pumpkins and monsters, they are also practicing skills they'll use every day.

Stronger little hands

Gripping crayons and staying inside the lines builds the fine motor control kids later use to write.

Focus & patience

Finishing a whole page means sticking with one task from start to end, a skill that grows with practice.

Creativity

There's no wrong color here. A purple pumpkin or a green vampire is a wonderful choice.

A calm moment

Quiet, repetitive coloring can help children slow down and unwind after a busy, sugary day.

Colors & words

Naming colors, shapes and characters while coloring grows vocabulary and visual recognition.

Confidence

A finished page on the fridge is a small, proud "I did it!" that kids love to show off.

TIPS

Grab a page and color alongside them, chat about the characters and invent their stories, and praise the effort rather than the neatness. Print any page again whenever you like!

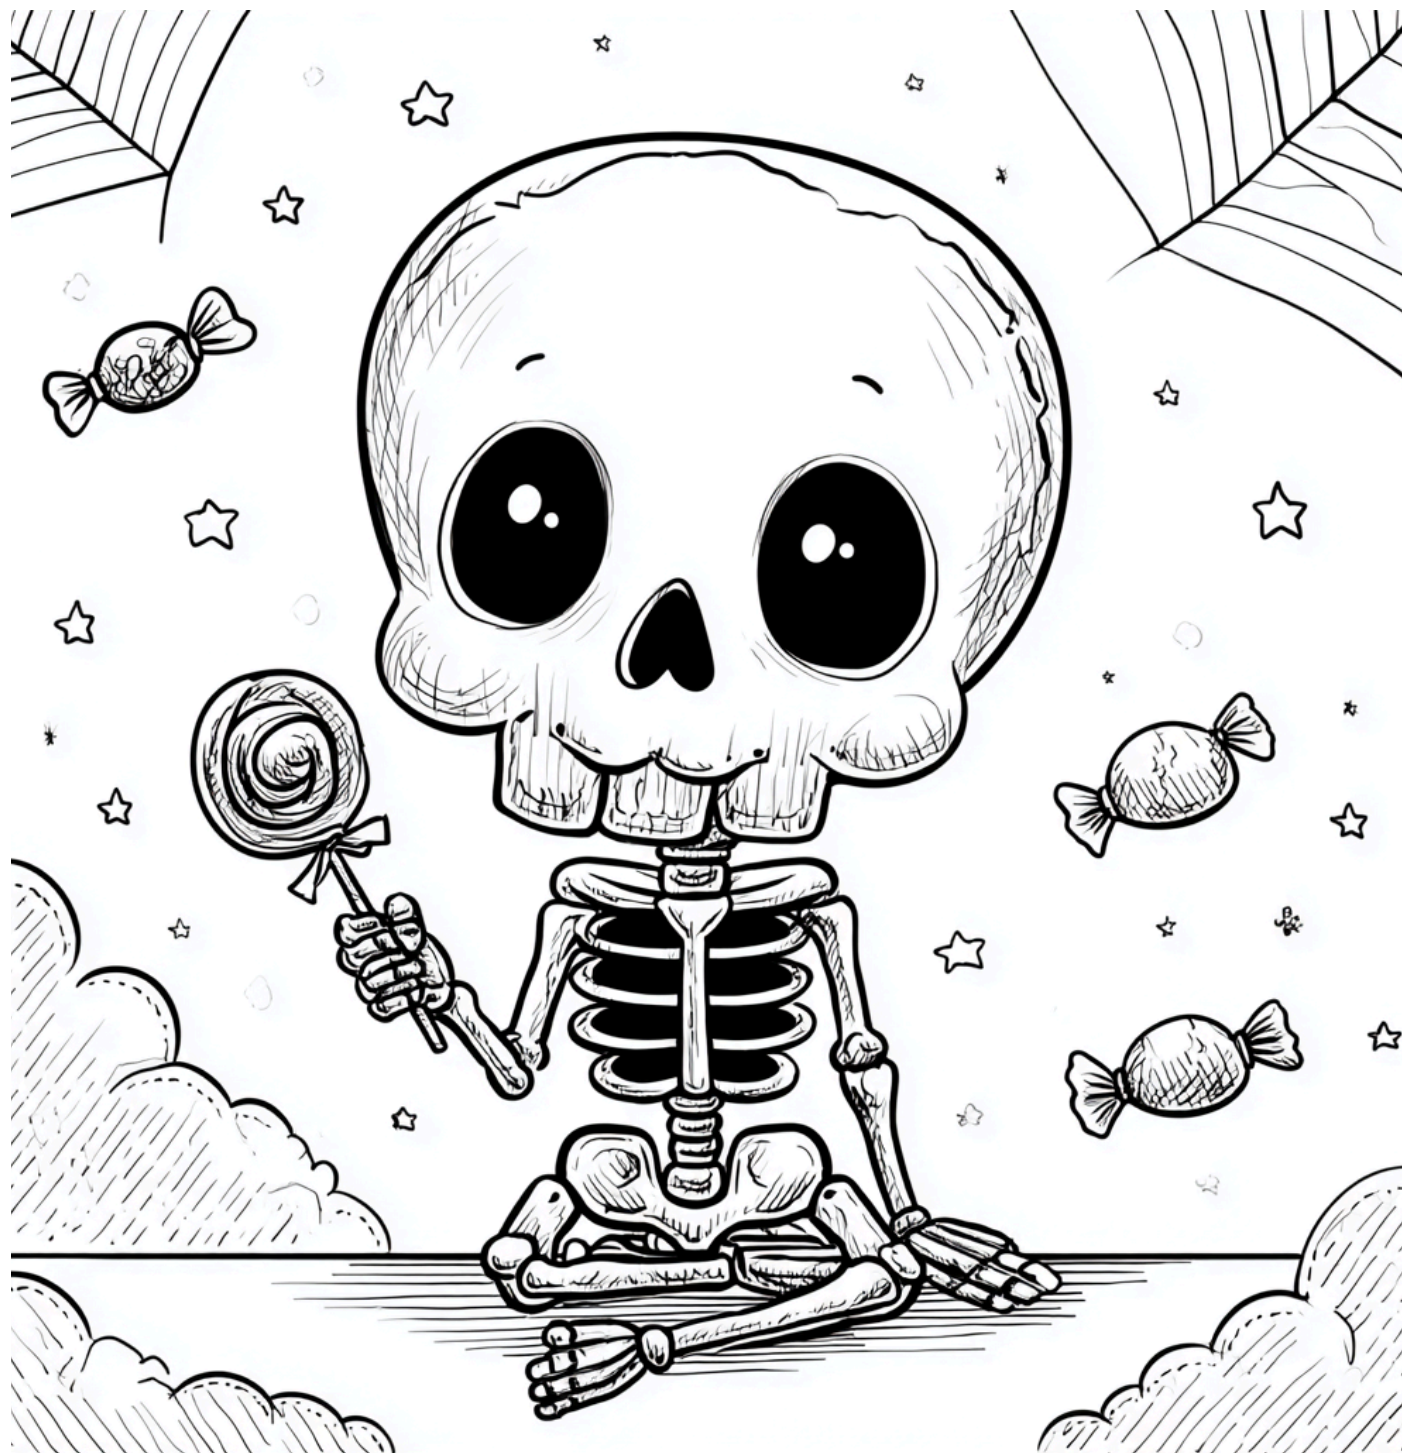

**HAPPY
HALLOWEEN**
